-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 08 April 2003.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 3-7,9,11-13 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 3-7,9 and 11-13 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
* See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892) 4) ☐ Interview Summary (PTO-413) Paper No(s). _____
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948) 5) ☐ Notice of Informal Patent Application (PTO-152)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) _____. 6) ☐ Other: _____

Art Unit: 2141

DETAILED ACTION

Applicant's disclosure in regarding canceling the claim 9 and amending the claim 9 contradict it self and requires correction. Examiner advises the applicant to clarify the status of the claim 9.

Examiner did consider the amended claim 9 in the current office action.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 3-7, 9, 11-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yao et al (U.S. 5,938,734) and further in view of Asamizuya et al (U.S. 6,314,576).

4. As per claims 3, 12, 13 Yao disclosed further comprising a distribution control unit controlling an information distribution device regarding a distribution of a content as real-time reproducible stream information from the distribution device regarding a distribution of a content as real-time reproducible stream information from the distribution device to a receiving device (col. 3, lines 1-20 & col. 11, lines 17-27); and a memory unit storing a distribution schedule information of the distribution control unit and the reproduction control unit, wherein the distribution schedule information comprises information on a time and a date to start and end the

Art Unit: 2141

distribution of the content, and the distribution control unit controls the information distribution device based on the stored distribution schedule information (col. 3, lines 1-20).

However Yao failed to disclose a reproduction control unit controlling the receiving device regarding a real-time reproduction of the stream information and the reproduction control unit controls the receiving device based on the stored distribution schedule information

In the same field of endeavor Asamizuya disclosed the near-video-on-demand (NVOD) compilation unit has a film stock conversion device (device called "Telecine") which reads the movie of the film stock recorded on the films and converts the same to video signals and audio signals, that is, AV signals. Further, the near-video-on-demand (NVOD) compilation unit has a video signal reproducing apparatus for reproducing the analog or digital AV signals recorded on video tape (referred to as "VTR stock") (col. 8, lines 57-65).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to have incorporated the reproduction control unit which controls said receiving device, regarding a real-time reproduction of the stream information as taught by Asamizuya in the method of Yao to be more versatile in the methodology of digital data streaming and reduce the cost.

3. As per claim 2 Yao-Asamizuya disclosed further comprising a change-over unit to be manipulated by an operator for changing over the control of the reproduction control unit to

Art Unit: 2141

other control, wherein said reproduction control unit controls said receiving device according to the control changed-over by said changed-over unit (Asamizuya, col. 9, lines 30-49).

5. As per claim 4 Yao-Asamizyua disclosed wherein a plurality of said receiving devices are provided, and said reproduction control unit carries out an identical control to each of said receiving device and prohibits an execution of an external control relating to a reproduction at said receiving devices (Asamizuya , col. 10, lines 5-12).

6. As per claim 5 Yao-Asamizyua disclosed wherein a plurality of said receiving devices are provided, and said reproduction control unit carries out an identical control to each of said receiving devices and permits an execution of an external control relating to a reproduction at said receiving devices (Asamizuya, col. 9, lines 30-49).

7. As per claims 6,7 Yao-Asamizyua disclosed a distribution control unit which controls an information distribution device to distribute real-time reproducible stream information to the distribution control unit itself (Yao, col. 11, lines 15-37); an editing unit receiving the content as the real-time reproducible stream information from the information distribution device, and editing and distributing the received real-time reproducible stream information (Asamizyua, col. 8, lines 63-67) wherein the reproduction control unit controls the receiving device regarding the real-time reproduction of the edited stream information (Asamizyua, col. 8, lines 50-65).

Art Unit: 2141

8. As per claims 8,10 Yao-Asamizyua disclosed an information distribution/reproduction control apparatus comprising: a distribution control unit which controls a plurality of information distribution devices (Yao, col. 6, lines 25-36), regarding a distribution of stream information including moving picture data that can be reproduced in real time to a receiving device (Asamizyua, col. 4, lines 1-17); and a reproduction control unit which controls said receiving device, regarding a display method relating to a real-time reproduction of a plurality of the stream information (Asamizyua, col. 8, lines 63-67).

9. As per claims 9,11 Yao-Asamizyua disclosed the invention substantially in claim 1 including further comprising a distribution control unit controlling a plurality of information distribution devices regarding a distribution of stream information including moving picture data that can be reproduced in real time to a receiving device (Yao, col. 3, lines 1-20); a reproduction control unit controlling the receiving device regarding a display method relating to a real-time reproduction of a plurality of the stream information (Asamizyua, col. 8, lines 57-65); and a memory unit storing importance level information on the importance level of each of the plurality of stream information (Yao, col. 4, lines 6-21), wherein said reproduction control unit controls said receiving device so as to reproduce a higher priority stream information of higher level of importance with higher priority over the rest of the stream information based on the stored importance level information (Asamizyua, col. 10, lines 21-49).

Examiner addressed all the new limitation added to the claims.

Conclusion

10. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

11. Any inquiry concerning this communication or earlier communication from the examiner should be directed to Adnan Mirza whose telephone number is (703)-305-4633.

12. The examiner can normally be reached on Monday to Friday during normal business hours.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Wiley can be reached on (703)-308-5221. The fax for this group is (703)-746-7239.

Art Unit: 2141

13. The fax phone numbers for the organization where this application or proceeding is assigned are as follows:

(703)-746-7239 (For Status Inquiries, Informal or Draft Communications, please label "PROPOSED" or "DRAFT");

(703)-746-7239 (For Official Communications Intended for entry, please mark "EXPEDITED PROCEDURE"),

(703)-746-7238 (For After Final Communications).

14. Any Inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703)-305-3900.

Any response to a final action should be mailed to:

BOX AF

Commissioner of Patents and Trademarks Washington, D.C.20231

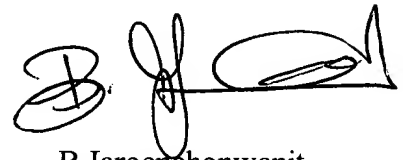

Or faxed to:

Hand-delivered responses should be brought to 4th Floor Receptionist, Crystal Park II,
2021 Crystal Drive, Arlington, VA 22202.
